

1))) What's in the Box

C100 Wireless Monitor

6' Temperature Sensor
(optional)

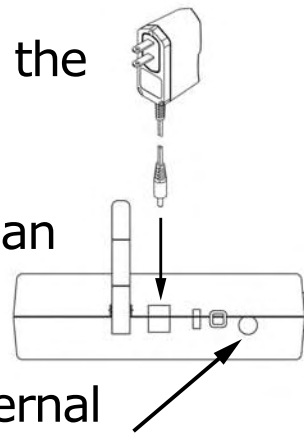

AC Wall Adapter

2))) Connect the AC Power

Connect the AC power to the power jack on the C100.

Plug the AC adapter into an electrical outlet.

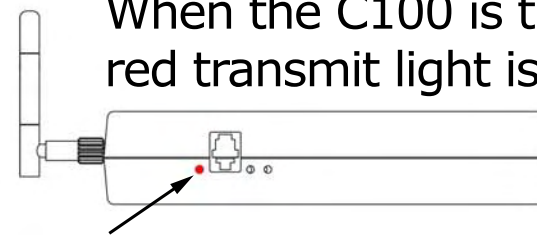

Your C100 will use its internal temperature sensor unless you connect the optional external probe.

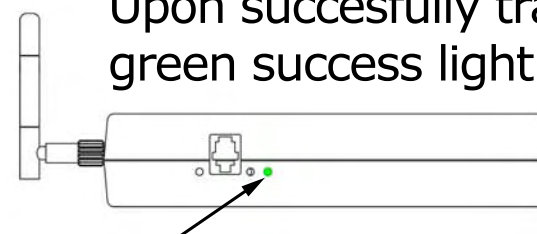

3))) Verify Wireless Signal

Your C100 will immediately begin sending temperatures over the Climatednet wireless network to our 24/7 monitoring center.

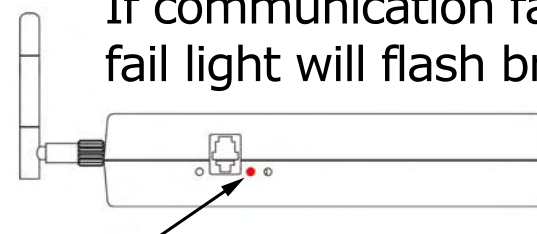

When the C100 is transmitting, the red transmit light is illuminated:

Upon successfully transmitting, the green success light will flash briefly:

If communication failed, the red fail light will flash briefly:

In the rare case of a failure, you will need to contact support.

4))) Log Into Your Account

To set your high and low temperature alarms, please visit [visit canareze.com](http://www.canareze.com) and click on "Log In."

Click on "Device List" and then click on the "Edit" link next to your device.

Once you've made your changes, click the save button.

Please click on the help link at the top of the page if you require further assistance.

Thank you for choosing canareze!
